Drew Epperson, Senior Federal Solution Architect - Intel Security

Drew Epperson is the Senior Solution Architect for the Federal Division of Intel Security, formerly McAfee. Drew has been leveraged as a subject matter expert within the DoD community for six years. During this time, Drew has designed, implemented, and supported enterprise deployments of Intel Security solutions. Drew specializes leveraging technologies that range from host & network security to content protection and addressing insider threat prevention.

Previously, Drew held the position of Senior Intel Security systems engineer supporting the Navy, Marine Corps, and Combatant Commands. In that position, Drew leveraged all of his expertise to support customers in securing both enterprise and tactical environments.

Prior to the engineering position, Drew was a member of Intel Security's Professional Services Division as the Senior Enterprise Architect assigned to the HBSS program. At DISA Headquarters Ft. Meade Maryland, Drew ensured HBSS was properly architected to meet the needs of the Department of Defense. While in this position, Drew supervised the design and implementation of multiple custom solutions that were requested by DISA and US Cyber Command.

About Intel Security
